

LIGHTING INVENTORY: May 31 through June 9, 2000

PLEASE KEEP THIS INVENTORY and refer to it if you see any NEW lights installed after June 23, 2000, that are NOT full cutoff fixtures, or if you see any NEW mercury vapor lights, which are prohibited (lights are listed by category – Businesses, Residences, etc. – and street address). We will need everyone’s help in identifying any NEW lights that are prohibited under our ordinance. If you find any such lights, please call or email Jim Walker, 364-2467 or jwalker@brooksddata.net.

NOTE: This inventory lists those overhead floodlights and wallpacks requiring adjustment under the Alpine Lighting Ordinance. Under Section 3 A (1), the axis of illumination of floodlights mounted overhead shall be adjusted to an angle *not more than* 20 degrees from the vertical (see attached Exhibits 1 and 2). Under Section 3 A (3), wallpacks shall be adjusted *where possible* to minimize the amount of light emitted above the horizontal; many wallpacks cannot be adjusted in this way.
